SAAD ULLAH

SENIOR SOFTWARE ENGINEER

7+ years of experience building scalable, high-impact apps across iOS, Android, and cross-platform solutions. Skilled in Swift, SwiftUI, Kotlin, KMM, and ReactJS. Experienced in leading end-to-end mobile development, optimizing performance, and delivering business-critical features. Passionate about leveraging AI-powered tools to boost productivity and innovation.

Experience

July 2023 - Currently
SENIOR SOFTWARE ENGINEER | ELECTROLUX
- Led development of Electrolux air purifiers, using AI-assisted workflows to speed up refactoring, code reviews, and debugging.
- Used Cursor, GitHub Copilot, and ChatGPT to accelerate feature delivery, improve code quality, and enhance test automation.

June 2022 - June 2023
SENIOR MOBILE ENGINEER | MONEYLION MALAYSIA
- Implemented OIDC protocol for the platform to enhance authentication security.
- Led R&D efforts for the P2P feature, successfully delivering it to 100% of production users.
- Modernised outdated procedures, libraries, and best practices to improve development efficiency.

Feb 2020 - May. 2022
MOBILE ENGINEER | FAVE ASIA
- Revamped the app, resulting in a 70% increase in DAU.
- Identified and resolved critical issues, improving app efficiency by 30%.
- Enhanced scalability by developing a reusable component library.

July 2018 - Jan. 2020
SOFTWARE ENGINEER - L2 | DIGITAL DIVIDEND
- Created and deployed 10+ kids' apps and games, achieving 400k+ downloads on iPhone & iPad, including rebuilding an outdated Unity app that generated $2.5k revenue in a single month.
- Collaborated with 5+ engineers and the design team to build 4 high-quality apps, all achieving 4+ star reviews.

June 2017 - June 2018
IOS DEVELOPER | RIGHT SOLUTION
- Developed and deployed 10+ Swift/Objective-C apps to the App Store, integrating core features like Notifications, Maps, Social Accounts, and HealthKit.
- Documented best practices and mentored an intern on iOS concepts and design patterns.

June 2016 - July 2016
IOS DEVELOPER - INTERN | ROCKVILLE TECHNOLOGIES
- Worked on replicating the Android app into IOS App using Swift.
- Learned the core concepts of Swift and Best Coding practices

Skills

Core Development:

Swift | SwiftUI | RxSwift | Objective-C | C#
Kotlin | KMM (Kotlin Multiplatform)
ReactJS | React Native
Remix JS | TypeScript | Node.js
HTML / CSS
REST API

Architecture and Testing:

MVVM | MVP | Clean Architecture
State Management: RxSwift, Combine, Redux
TDD | Unit Tests | XCTest UI
CI/CD (GitHub Actions, Jenkins, CircleCI)

AI & Productivity Tools:

Github Copilot | ChatGPT | CursorAI
Figma AI Plugins
MCP Servers
GPT4All | LLM Studio

Collaboration & Workflows:

Git | GitHub | GitLab | Bitbucket
Jira | Trello | Notion | Confluence
Agile & Scrum Methodologies JIRA
Code Review Proficiency

Tools & Technologies:

Firebase | CoreData | REALM | SQLite | PostgresSQL
Figma, Illustrator, Adobe XD, Component libraries

Education

2013 - 2017

DHA SUFFA UNIVERSITY, PAKISTAN
Bachelors in Computer Science
